small diamond aluminium security mesh

SD30

Thirty times stronger than your average security product, SD30 is double welded in the corners and then every second contact point.

Prowler Proof has elevated the industry standard by offering you the choice of the Small Diamond product. SD30 has been designed to have a smaller opening in the mesh to reduce a prowlers' ability to gain access to your home. It is also thirty times stronger than your average security product offering great value.

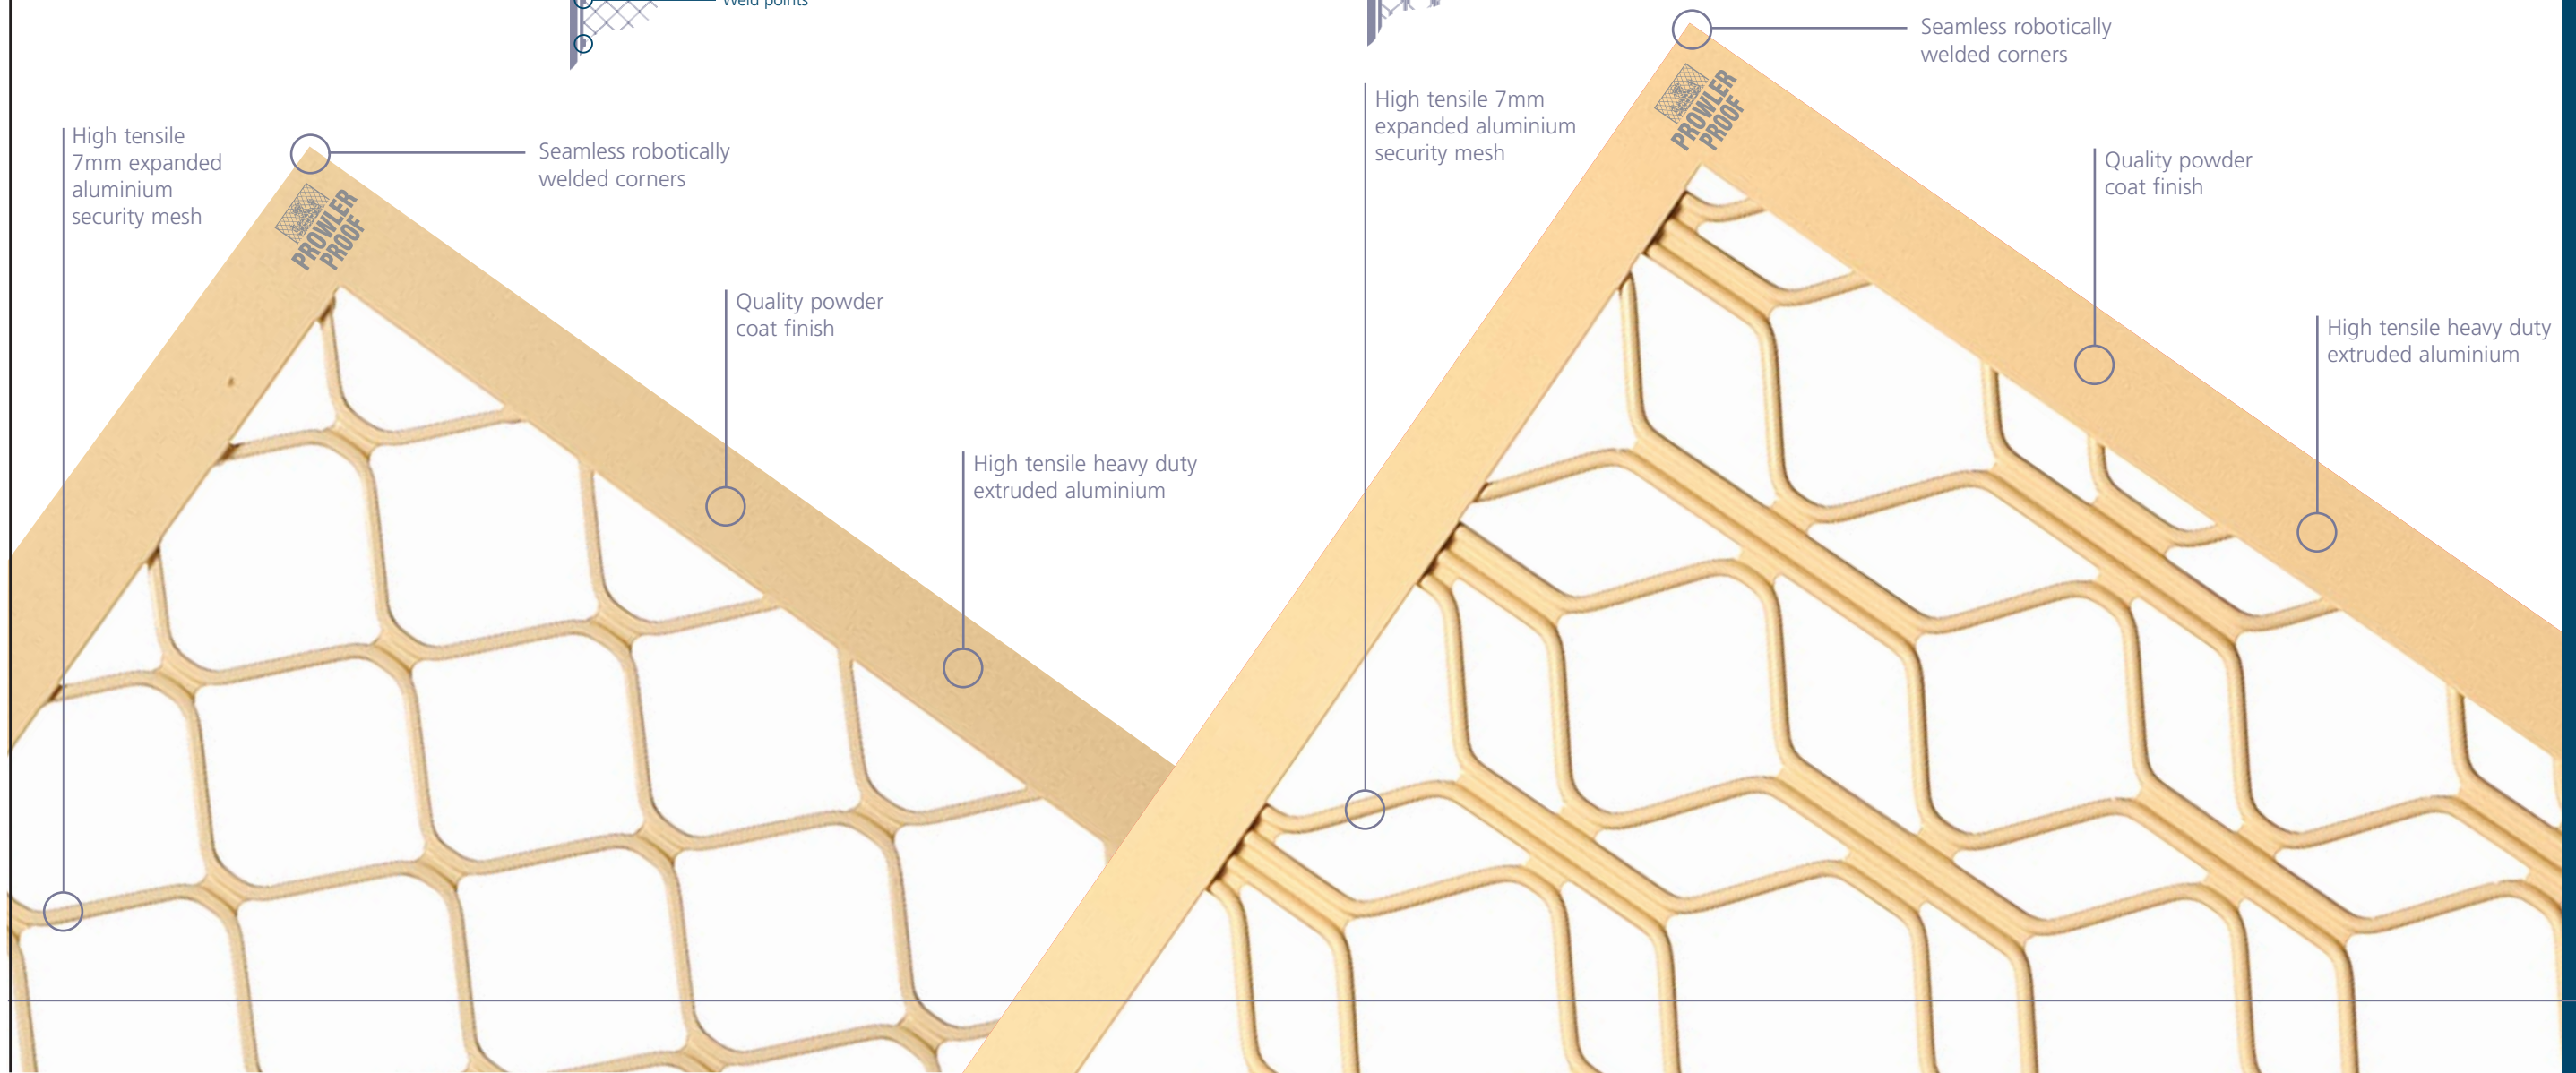

double diamond aluminium security mesh

DD40

Forty times stronger than your average security product, DD40 is a premium security product that is double welded in the corners and then every second contact point.

The Double Diamond security product offers you something a little different. DD40 combines an attractive design with impressive quality and strength. The DD40 is an extremely reliable product with a superior finish that provides excellent value for money.
